

BROWN CORUNDUM

CHF 3.95

IMPORTANT MESSAGE:

Due to the current situation, only daily prices apply to all grits of this blasting agent. Medium-term framework agreements are no longer possible because prices are constantly changing.

Obtaining standard corundum from Eastern Europe or Asia has become almost impossible. The listed price is only a non-binding target price. Please inquire about prices and delivery options by phone or email.

Description

Brown aluminum oxide is an iron-free abrasive with an angular grain. Bauxite corundum is formed in the arc furnace at high temperatures. It has a high degree of hardness (MOHS 9) and is extremely tough. It can be used both in the dry blasting process (pressure blasting / injector blasting) and in the wet blasting process.

Application

- Cleaning metallic surfaces (abrasive)
 - Removal of paint
 - Removing rust and descaling metallic surfaces
 - Matting surfaces
 - Preparation for protective layer application
 - Roughening of metallic surfaces before coating
 - Deburring
 - Sandblasting of stone
 - For non-slip industrial floors
-
